

# SECURY PLOOF

Classic

## OUR SYSTEM ALARM

helps you watching over  
your children,  
not the swimming pool!

Your child is wearing  
a funny bracelet.  
You keep a portable  
box that alerts:

If your child fall into water

If your child is beyond  
30 meters from you

DISTANCE ALARM

The Securyploof has been specially designed to be used in all the situation. It will work with salted water on the beach, in dirty water in a pond, with chlorinated water in a swimming pool, etc.

## THE SYSTEM INCLUDES

**2 bracelets** radio transmitter including a detector of immersion and distance.

**1 alarm box** to watch over two children at the same time. Portable box with tie encircles or put on its removable foot.

**1 adapter** for a convenient daily use at home.

[www.securyploof.com](http://www.securyploof.com)

Securyploof will set up itself automatically and will warn you when:

**The bracelet gets in touch with water.**

It will alert only when the bracelet is fully immersed to avoid untimely alerts. Drops on the bracelet will have no effect for example.

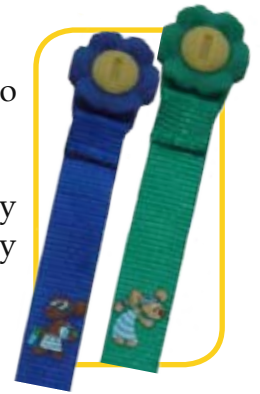

**The receiver will beep using a continuous beep and the LED will light up.**

**The bracelet is beyond 30 meters from the receiver for more than 20 seconds.**

**The receiver will beep using a continuous beep and the LED will light up.**

The bracelet was conceived in order to resist to three times the strength of a 5-year-old child.

To limit the risks of detachment of the bracelet by your child, the lock "flower" locks and unlocks by means of a coin.

At the back of the watch, you will find a sticker to be filled.

Register it the name of the child to whom belongs the watch, and the coordinates where to contact you in case of emergency.
